

# ERN eUROGEN registry

## Report on Common Data Elements

### INTRODUCTION

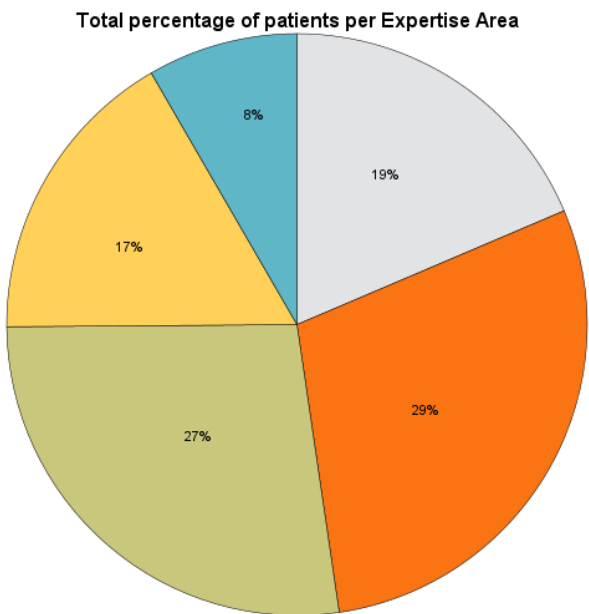

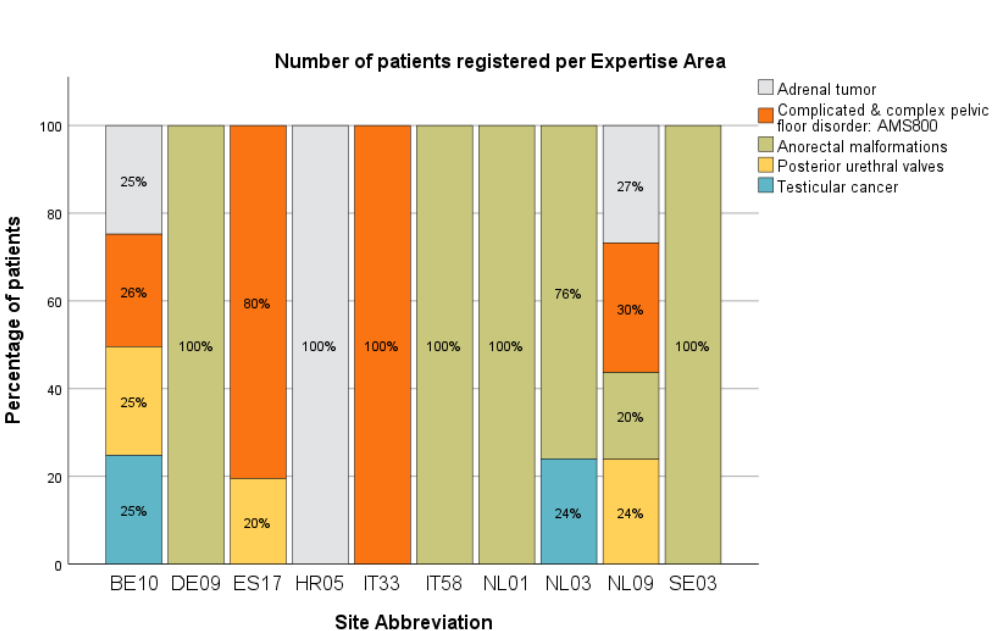

This report shows the number of patients entered retrospectively in the ERN eUROGEN registry for five Expertise Area's with a finished Clinical Practice Snapshot. The included Expertise Area's are 1.5 Posterior urethral valves, 1.7 Anorectal malformations, 2.1 Complicated and complex pelvic floor disorders: AMS800 device, 3.2 Testicular cancer and 3.3 Adrenal tumors. Currently, the ERN eUROGEN registry includes almost 1000, but only over 400 patients are included in the current analysis. The remaining patients are either prospectively registered patients, patients for Expertise Area's without a Clinical Practice Snapshot or patients without a completed Clinical Practice Snapshot for one of the five Expertise Area's in this analysis. Only the HCPs who completely entered 5 retrospectively collected patients for one of the Expertise Areas for which the Clinical Practice Snapshot was developed, are included in this report.

### COMMON DATA ELEMENTS

#### Patient numbers per Expertise Area

Overview of retrospective patients entered in the ERN eUROGEN registry per HCP and per Expertise Area (EA).

HCP	EA	1.5 - PUV	1.7 - ARM	2.1 – AMS800	3.2 - TEC	3.3 - ADT	TOTAL
BE10 – Leuven UZ		30		31	30	30	121
DE09 – Bremen-Mitte Klinik			34				34
ES17 – Barcelona Fundació Puigvert		8		33			41
HR05 – Zagreb Sestre Milordsnice						12	12
