**Workstream List**

Workstream 1: Rare congenital uro-recto-genital anomalies
Workstream 2: Functional urogenital conditions requiring highly specialised surgery
Workstream 3: Rare urogenital tumours

**Expertise-Area List**

1.1 Complex genital reconstructions (DSDs)
1.2 Bladder exstrophy/epispadias
1.3 Rare urologic stone & kidney diseases
1.4 Non-syndromic urogenital tract malformation
1.5 Posterior urethral valve
1.6 Posterior hypospadias
1.7 Urorectal/anorectal malformations
2.1 Complicated & complex pelvic floor disorders
2.2 Rare diseases & conditions affecting female urethra
2.3 Urethral reconstruction in rare diseases & conditions
2.4 Rare retroperitoneal diseases & conditions
2.5 Interstitial cystitis
2.6 Adult urogenital reconstructive surgery
2.7 Surgery for transgender patients
3.1 Penile cancer
3.2 Testicular cancer
3.3 Adrenal tumours
3.4 Abdomino pelvic sarcoma
3.5 Rare renal tumour surgery

■ HCP has full expertise in this area

■ HCP has restricted expertise in this area. This is primarily due to the fact that, whilst it is still heavily involved in the patients' journey for this Expertise Area (e.g. follow-up), it does not currently undertake the requisite number of surgeries per year to meet the network's threshold for this area of expertise.
